

PLAYERNEOS TUTORIAL - Walkthrough of the App

PlayerNeos is an app that lets its users to create a video player. You can use video URLs from YouTube, Vimeo or any other video link and can create your own customized player for that video.

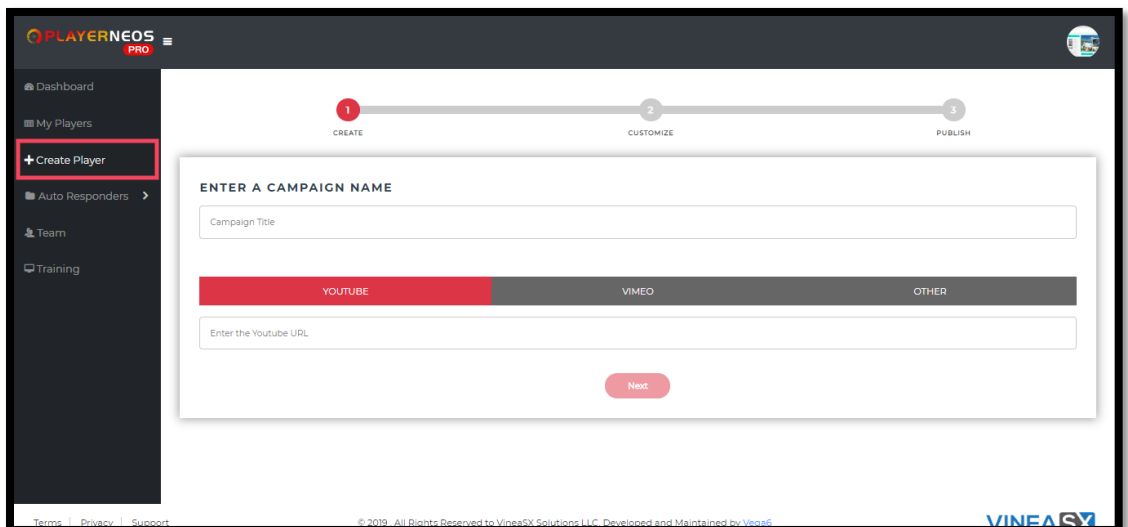

- A. **The Dashboard**- on the dashboard you will be able to see the summary of your projects such as the total players you created, auto responders, pending players, etc.

- B. **My Players**- here you can see the list of players created under your account.

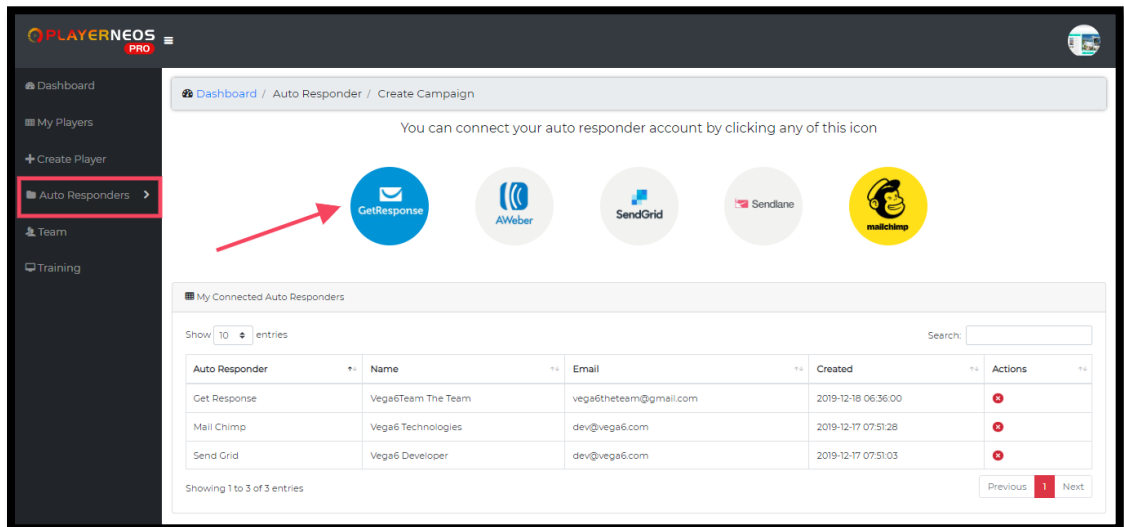

- C. **Create Player**- you can create your player here, customize it accordingly and publish.

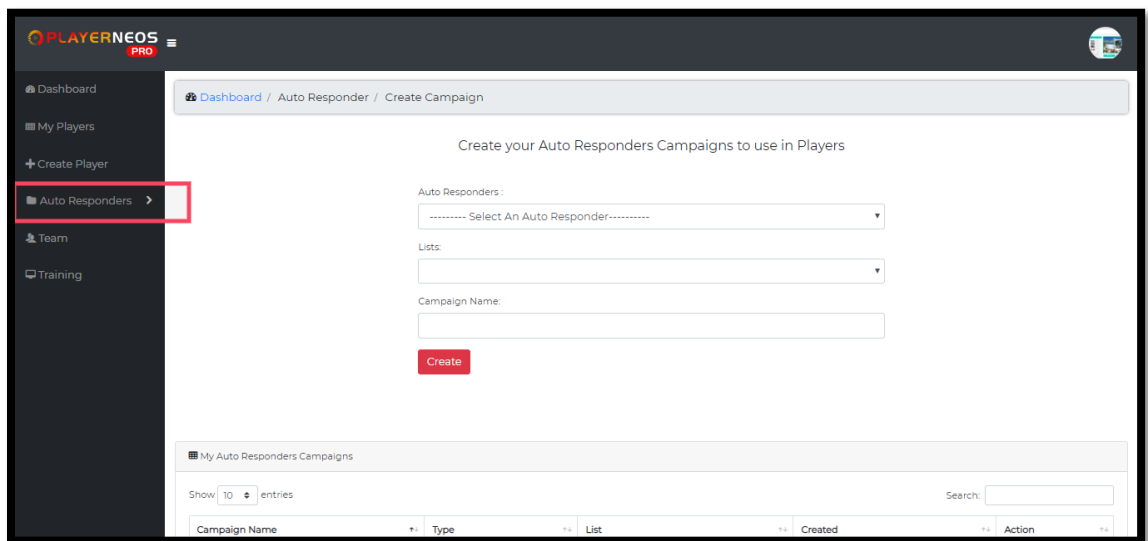

D. Auto-Responders- You can integrate and create auto responder campaigns within a player for your email optin purpose.

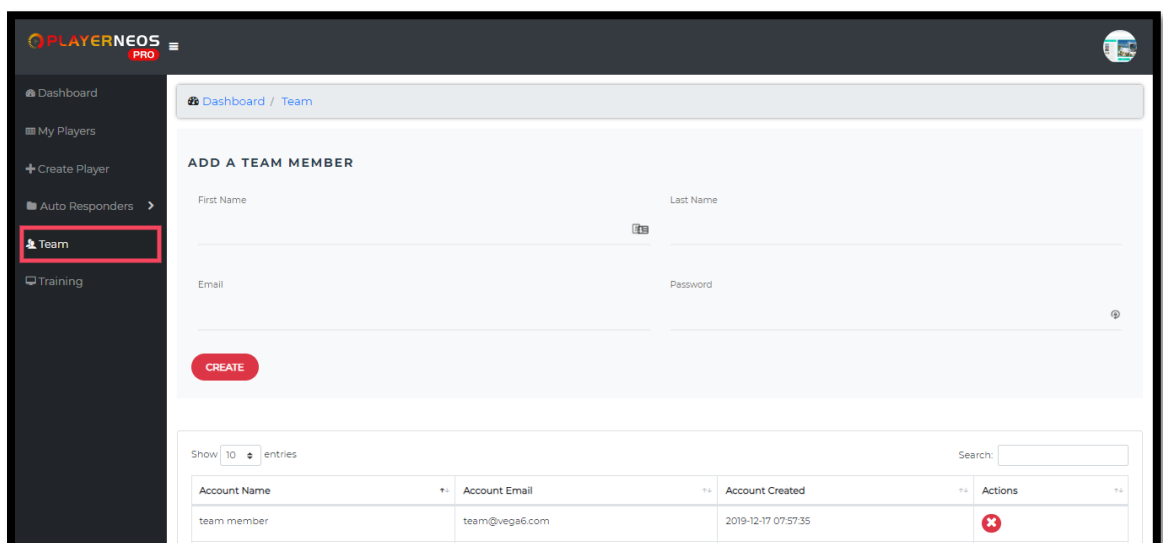

1. **Connect Account**- You can connect your auto responder accounts by clicking any of the icons as below.

2. **Create Campaigns**- create your auto responder campaigns to use in your player

E. **Team**- here you can create team members who will be able to login on behalf of parent user and can create player and perform other actions.

- F. Training- here you will be able to see PDF tutorials and video tutorials you can use as guide in using the PlayerNeos app.
